DARWIN DAY TENNESSEE PRESENTS

DR. WILLIAM E. FRIEDMAN

KEYNOTE LECTURE

FEBRUARY 11 7PM

AMB COX MEMORIAL AUDITORIUM

A DARWINIAN LOOK AT DARWIN'S EVOLUTIONIST ANCESTORS

Have you ever wondered about how we thought about evolution before Charles Darwin's groundbreaking *On the Origin of Species*? Join us for an exciting look at the people and ideas that came before Darwin and led to the founding of evolution as the great unifying theme in biology. Dr. William E. Friedman is professor of Ecology and Evolutionary Biology at the University of Colorado. He has published 60+ scientific articles and his research has changed the way we think about the origin and diversification of flowering plants.
