

Course Schedule for Math589/ EEB504 for Spring 2017

We are meeting on Wednesdays at 1:25-2:15 in Ayres 122

The below is a list of chapters from the text - it is expected that each presenter for a week will consider an additional reading or two that they suggest participants look at in advance of the session. I will be happy to discuss possible readings but I suggest that you start by doing a search for papers that reference the text or do a search on the chapter topic.

If you are sharing a split of a chapter with someone else, it is your responsibility to decide how to partition the chapter and to let the class know in advance.
